

One-Year Professional Master's in **Environment and Sustainable Development**

We are accepting applications
from all nationalities

ADMISSIONS ARE OPEN **FOR GRADUATE STUDENTS** **ABOUT THE PROGRAM**

Although many efforts on sustainable environmental management while fostering economic growth have been globally and regionally made, environmental policy makers, managers and practitioners still struggle to find out sustainable approaches for environmental development management.

This master program in **Environment and Sustainable Development** aims to train the professionals with a primary interest in the linkages between development economics and environmental management from the multidisciplinary approaches. Students are expected to gain essential knowledge, instruments, skills and techniques for making developmental practices more sustainable without compromising the environmental integrity and human health.
